Architectural / **Price List.**

Light up your 2024.

Symbol list

NEW	Item available for the sale starting from the 1st January 2024.
SKU	Code corresponding to the last 6 digits of the ean code.
ITEM	Item's name.
PUBLIC PRICE vat not included	Prices indicated in the price list are referred to the public. Each price is in Euro and concerns one single piece. No further promotions can be applied to bulbs and strip led recommended prices. Whenever purchased separately as "optional", the DIMMABLE DRIVER will be already included in the product as replacement for the default on-off driver: only one driver will be supplied.
BULB INCLUDED	The bulbs supplied can be of different brands according to their availability in the warehouse and typology of lamp socket.
NET WEIGHT Kg	Item's net weight excluding packaging.
VOLUME m ³	Size of the packaging containing the item.
BASE	Type of bulb holder.
CATALOGUE	Corresponding catalogue.
POWER Watt	Rated input power of the light source, or rated output power of the driver.
FLUX Lumen	Rated luminous flux of the light source.
CCT Kelvin	Correlated colour temperature of the light source.
MIN. QTY.	MINIMUM QUANTITY OF PIECES The articles marked with this icon have a precise quantity of pieces inside of one package.
PAGE	Corresponding page in the Catalogue.

Notes

-The indicated prices are public prices VAT excluded.

-Ideal lux s.r.l. reserves the right to make, at any time and without notice, all the changes necessary to improve the quality of the items included in this catalogue. For the most updated features, please check the documentation available on our website (www.ideal-lux.com).

-Our products with Class I and II work with nominal Voltage of 220-240 Vac 50/60 Hz. All our products comply with EU legislation.

-Whenever purchased separately as "optional", the DIMMABLE DRIVER will be already included in the product as replacement for the default on-off driver: only one driver will be supplied.

-The Watt indicated in the catalogue express the NOMINAL power of the lighting fitting including source and driver, when present. The Lumen measures referred to the lighting fittings with integrated LED source are nominal, namely referred to the source. We kindly invite you to check photometry files for the actual Lumen of the single lighting fittings. For further information and updates.

-The UGR rate is not a characteristic of the fitting itself, but of the installation. The UGR values reported in this catalogue are calculated taking into consideration an ideal installation and are regrouped into blocks <10 <13 <16 <19 <22. It is recommended to calculate the specific UGR according to your installation.

-The useful life of the LED sources of all the products in the catalogue refers, when it is not differently declared, to the L70B50 value.
